

**58MVB INFINITY™ 96  
DELUXE 4-WAY MULTIFOISE VARIABLE-SPEED  
TWO-STAGE CONDENSING GAS FURNACE  
Series 120 Input Rates: 40,000 thru 120,000 Btuh**

## Product Data

A05069

### **Comfort Heat™ technology, the ultimate in heating comfort . . .**

The Carrier Infinity™ 96 with Comfort Heat™ technology achieves the optimum combination of comfort and efficiency.

The Infinity™ 96 achieves industry-leading ultra-high efficiency at up to 96.6 percent Annual Fuel Utilization Efficiency (AFUE). Efficient performance is enhanced through the variable-speed design. To maintain ideal comfort, Comfort Heat™ technology automatically adjusts the heating level, maximizing the use of low heating levels that produce near silent furnace operation while meeting the exact heating needs. This unit is designed to keep the indoor temperature within less than 1 degree of the thermostat setpoint. Because it operates in low heat most of the time, the Infinity™ 96 uses up to 80% less power than single-capacity furnaces.

In addition to providing ultimate comfort, the Infinity™ 96 has a sealed combustion system. This system brings combustion air to the furnace and vents flue gases outside the furnace in a safe manner. Because it is sealed, operational noise is minimal. A sealed combustion system also means fewer cold drafts and less air infiltration.

The Infinity™ 96 is available in 6 heat/airflow combinations. The unit has a 4-way multifoise design and can be installed in upflow, downflow, or horizontal positions covering up to 24 different applications. The Infinity™ 96 can be vented as a Direct vent/2-pipe furnace or as a non-direct vent/1-pipe application.

The versatile 4-way multifoise design in conjunction with variable speed makes the Infinity™ 96 ideal for use with split system cooling, including 2-speed units. A Carrier Infinity™ air purifier, humidifier, comfort ventilator, and Comfort Zone II control will provide year round comfort and efficiency.

Designed for durability, comfort, and reliability, the Infinity™ 96 is the ultimate in versatile, efficient comfort.

**Carrier Infinity® System** — When the Infinity™ 96 variable-speed gas furnace is matched with the Infinity™ Control and an air conditioner or heat pump, the homeowner will experience the ultimate in Comfort Heat™ and IdealHumidity™ through unparalleled control of temperature, humidity, indoor air quality, and zoning. The Carrier Infinity™ System also provides unprecedented ease of use through onscreen, text-based service reminders and equipment malfunction alerts.

For even greater comfort and convenience, match the Infinity™ 96 furnace with an Infinity air conditioner or heat pump. This will create a fully communicating system, requiring only 4 thermostat wires between system components. In some cases, troubleshooting can even be done from the outdoor unit without entering the home. Optional remote access through telephone or Internet is also available when combined with a remote connectivity kit.

   
*IdealComfort* IdealHumidity

## INFINITY™ 96 FEATURES / BENEFITS

**IdealHumidity™**—The IdealHumidity system actively controls both temperature and humidity in the home to provide the best comfort all year long. Other systems depend on heating or cooling demand to manage the moisture in the air. But, IdealHumidity™ gives the homeowner the right amount of humidity day and night, even in mild weather. No other manufacturer can do this! IdealHumidity saves energy, too. By keeping humidity under control, the homeowner can set their thermostat to stay comfortable and save energy—up to 20% off their cooling costs!

**Comfort Heat™**—On the coldest days of the year, the Infinity™ 96 Furnace has the capacity to heat the home. On moderate days when less heat is required, this furnace will regulate itself to a lower capacity—providing a comfortable home and minimizing operating costs.

The patented algorithm adjusts the low heat operating time to match the indoor conditions.

**Reliable Heat Exchanger Design**—The primary heat exchanger is made of aluminized steel for corrosion resistance. The patented Serpentuff™ condensing heat exchanger cells are laminated with polypropylene for greater resistance to corrosion and epoxy coated externally to prevent oxidation. This break-through in heating technology helps extend the life of the furnace for years of dependable performance. The heat exchanger is positioned in the furnace to extract additional heat. Stainless steel coupling box componentry between heat exchangers has exceptional corrosion resistance in natural gas and propane applications.

**Power Heat™ Igniter**—Carrier's unique SiN igniter is not only physically robust but it is also electrically robust. It is capable of running at line voltage and does not require complex voltage regulators as do other brands. This unique feature further enhances the reliability of Infinity™ 96 gas furnace and continues Carrier's tradition of technology leadership and innovation in providing a reliable and durable product.

**ComfortFan™**—Improves comfort all year long by allowing selection of the continuous fan speed right at the thermostat.

**SmartEvap™**—Allows the system to reduce summertime humidity levels by nearly 10% over standard systems.

**Media Filter Cabinet**—Enhanced indoor air quality in the home is made easier with our media filter cabinet—a standard accessory on all deluxe furnaces. When installed as a part of the system, this cabinet allows for easy and convenient addition of a Carrier high efficiency air filter.

**Comfort Heat™ Control Center**—The microprocessor control center features state-of-the-art combustion, temperature, and airflow control to maximize comfort while operating at peak efficiency.

Combustion control is obtained by taking the inducer motor RPM reading when the medium-heat pressure switch makes. Using this information, the microprocessor maintains a consistent air-to-fuel ratio independent of vent sizing and conditions during all phases of heat.

The first cycle after power reset provides 16 minutes of low heat before switching to high heat unless the room thermostat has been satisfied. Subsequent thermostat cycles provide anywhere from 0 to 16 minutes of low or medium heat depending on the length of the previous thermostat cycle.

Airflow control is accomplished by the microprocessor and blower motor. The ECM blower motor is configured by the microprocessor to react to changes in the static load on the air delivery system. The ECM blower uses this information to deliver correct airflow independent of variations in system restrictions. (For example, dirty filter or zone damper changes during a cycle.)

A special dehumidification function allows direct input from a thermostatic or humidistat. This input adjusts system airflow for greater humidity removal and increased cooling comfort during summer months.

**Direct Venting or Optional Ventilated Combustion Air**—The Infinity™ 96 can be installed as a 2-pipe (Direct Vent) furnace or as a non-direct vent/1-pipe application. This provides added flexibility to meet diverse installation needs.

**Electronic Variable-Speed Motors**—ECM Motors (Electronically Commutated Motor) provide variable-speed operation to optimize comfort levels in the home year round. They are also more economical to operate than standard motors.

**Sealed Combustion System**—Infinity™ 96 brings in combustion air from outside the furnace, which results in especially quiet operation.

**Insulation**—Foil-faced insulation in heat exchanger section of the casing minimizes heat loss.

**Insulated Blower Compartment**—The acoustical insulation reduces air and motor noise for quiet operation.

**Monoport Burners**—The burners are finely tuned for smooth, quiet combustion and economical operation.

**Bottom Closure**—Factory-installed for side return; easily removable for bottom return.

**Blower Access Panel Switch**—Automatically shuts off 115-v power to furnace whenever blower access panel is opened.

**Quality Registration**—The Infinity™ 96 is engineered and manufactured under an ISO 9001 registered quality system.

**Certifications**—The Infinity™ 96, Model 58MVB units are CSA. (A.G.A. and C.G.A.) design certified for use with natural and propane gases. The furnace is factory-shipped for use with natural gas. A C.S.A. listed gas conversion kit is required to convert furnace for use with propane gas. The efficiency is GAMA efficiency rating certified. The Infinity™ 96 meets California Air Quality Management District emission requirements.

These furnaces are not approved for installation in mobile homes.

## FURNACE COMPONENTS

58MVB

A02287

### NOTE:

- The 58MVB Furnace is built for use with natural gas. The furnace can be converted for propane gas with a factory-authorized and listed accessory conversion kit.
- Control location and actual controls may be different than shown above.

1. Burner sight glass for viewing burner flame.
2. Burner assembly (inside). Operates with energy-saving, inshot burners and hot surface igniter for safe, dependable heating.
3. Combustion-air intake connection to ensure contaminant-free air (right or left side).
4. Redundant 2-stage gas valve. Safe, efficient. Features one gas control with two internal shutoff valves.
5. Junction box for 115-v electrical power supply.
6. Vent outlet. Uses PVC pipe to carry vent gases from the furnace's combustion system (right or left side).
7. Secondary condensing heat exchanger (inside). Wrings out more heat through condensation. Constructed with patented Polypropylene-laminated steel to ensure durability.
8. Pressure switches ensure adequate flow of flue products through furnace and out vent system.
9. Inducer motor. Pulls hot flue gases through the heat exchangers, maintaining negative pressure for added safety.
10. Condensate drain connection. Collects moisture condensed during combustion process.
11. Heavy-duty blower. Circulates air across the heat exchangers to transfer heat into the home.
12. Air filter and retainer. May be used for side return application.
13. Rollout switch (manual reset) to prevent overtemperature.
14. Primary serpentine heat exchanger (inside). Stretches fuel dollars with the S-shaped heat-flow design. Solid construction of corrosion-resistant aluminized steel means reliability.
15. 3-amp fuse provides electrical and component protection.
16. Light emitting diodes (LEDs) on control center. Code lights are for diagnosing furnace operation and service requirements.
17. ComfortHeat™ Control Center.
18. Blower access panel safety interlock switch.
19. Transformer (24v) behind control center provides low-voltage power to furnace control and thermostat.

## MODEL NUMBER NOMENCLATURE

58MVB

## CARRIER ACCESSORIES

DESCRIPTION	PART NO.	UNIT SIZE					
		040-14	060-14	080-14	080-20	100-20	120-20

## THERMOSTAT AND ZONING CONTROL OPTIONS

### NON-PROGRAMMABLE THERMOSTAT SELECTION

<b>TC–NAC or TP–NAC</b>	For use with 1 speed Air Conditioner – °F/°C, Auto Changeover
<b>TC–NHC or TP–NHC</b>	For use with 1 speed Air Conditioner – °F/°C, Auto Changeover
<b>TP–NRH*</b>	For use with 2 speed Air Conditioner – °F/°C, Auto Changeover

\* Model HP & 2 Stage thermostat must be field converted to air conditioner operation.

### PROGRAMMABLE THERMOSTAT SELECTION

<b>TP–PAC</b>	For use with 1 speed Air Conditioner – °F/°C, Auto Changeover, 7–Day Programmable
<b>TP–PHP*</b>	For use with 1 speed Heat Pump – °F/°C, Auto Changeover, 7–Day Programmable
<b>TP–PRH*</b>	For use with 2 speed Air Conditioner – °F/°C, Auto Changeover, 7–Day Programmable
<b>TB–PAC</b>	For use with 1 speed Air Conditioner – °F/°C, Auto Changeover, 5–2 Programmable
<b>TP–PRH†</b>	For use with two–stage applications – °F/°C, Auto Changeover, 7–Day Programmable
<b>TP–PRH‡</b>	For multi–use/stage configurations – °F/°C, Auto Changeover 7–Day Programmable
<b>SYSTXCCUID01–B</b>	Infinity™ user interface

\* Model HP & 2 Stage thermostat must be field converted to air conditioner operation.

† Hybrid Heat™ thermostat is used with furnace and heat pump application.

‡ Thermidistat can be configured for heating, cooling, and Hybrid Heat applications. It must be configured for each specific application.

### ZONING CONTROL SELECTION

<b>ZONECC3Z(AC/HP)01</b>	WeatherMaker Two–Zone Kit
<b>ZONECC2KIT01–B</b>	Comfort Zone II–B 2–Zone Kit
<b>ZONECC4KIT01–B</b>	Comfort Zone II–B 4–Zone Kit
<b>ZONECC8KIT01–B</b>	Comfort Zone II–B 8–Zone Kit
<b>SYSTXCCUIZ01–B</b>	Infinity Zone User Interface
<b>SYSTXCCR01</b>	Infinity Remote Room Sensor
<b>SYSTXCCSMS01</b>	Infinity Smart Sensor
<b>SYSTXCC4ZC01</b>	Infinity 4–Zone Damper Control

Control Center

Heat Exchanger

Inducer Assembly

Concentric Vent Kit

A93086

A concentric vent kit allows vent and combustion-air pipes to terminate through a single exit in a roof or side wall. One pipe runs inside the other allowing venting through the inner pipe and combustion air to be drawn in through the outer pipe.

Downflow Subbase

A88202

One base fits all furnace sizes. The base is designed to be installed between the furnace and a combustible floor when no coil box is used or when a coil box other than a Carrier cased coil is used. It is A.G.A. design certified for use with Carrier 58MVB furnaces when installed in downflow applications.

### ELECTRONIC OR MECHANICAL AIR CLEANER

Cleans the air of smoke, dirt, and many pollens commonly found. Saves decorating and cleaning expenses by keeping carpets, furniture and drapes cleaner.

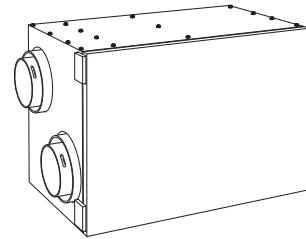

### HUMIDIFIER

By adding moisture to winter-dry air, a Carrier Humidifier can often improve comfort and keeps woodwork, wallpaper, and paint in better condition. Moisturizing household air also helps to retain normal body heat and provides comfort at lower temperatures.

### CONTROLS: THERMOSTATS AND ZONING

Available in programmable and non-programmable models, Carrier thermostats maintain a constant, comfortable temperature level in the home.

### ENERGY/HEAT RECOVERY VENTILATOR

Carrier's energy or heat recovery ventilators exhaust stale indoor air and provide fresh outdoor air to the home while minimizing heat loss and humidity level. Especially useful for today's tighter constructed houses.

Energy recovery ventilator is shown.

Use of the AHRI Certified TM Mark indicates a manufacturer's participation in the program. For verification of certification for individual products, go to [www.ahridirectory.org](http://www.ahridirectory.org).

\*Actual external static pressure (ESP) can be determined by using the fan laws (CFM<sup>2</sup> proportional to ESP); such as, a system with 1750 CFM at 0.5 ESP would operate at high–heating airflow of 1470 CFM at 0.35 ESP, medium–heating airflow of 705 CFM at 0.08 ESP and low–heating airflow of 525 CFM at 0.05 ESP.

†All heating CFM's are when low/medium heat rise adjustment switch (SW1–3) and comfort/efficiency adjustment switch (SW1–4) are OFF.

‡Ductwork must be sized for high–heating CFM within the operational range of ESP.

\*\*Wattage data provided is for the circulating blower with bottom return and does not include draft inducer, accessories, or gas controls.

†† Operation within the blank areas of the chart is not recommended because high–heat operation will be above 1.0 ESP.

\*\*\*All airflows on 21" casing size furnaces are 5% less on side return only installations.

**COMBUSTION-AIR PIPE FOR NON-DIRECT (1-PIPE) VENT APPLICATION (SIZES 040 THROUGH 120 ONLY)**

A96211

58MVB

**Length of Straight Pipe Portion of Combustion Air Inlet Pipe Assembly – In. (mm)**

CASING WIDTH	A
17 1/2 (444.5)	8 1/2+/- 1/2 (215.9 +/- 12.7)
21 (533.4)	10 1/2 +/ - 1/2 (266.7 +/- 12.7)
24 1/2 (622.3)	12 +/- 1/2 (304.8 +/- 12.7)

**CONCENTRIC VENT (DIRECT VENT / 2-PIPE ONLY) (ALL MODEL SIZES)**

**Dimensions (In / mm)**

KIT PART NO.	A*	B	C	D†	E	F
KGAVT0701CVT	33-3/8 (847.7)	2 (50.8)	3-1/2 (88.9)	16-5/8 (422.3)	6-1/4 (158.8)	5-3/4 (146.1)
KGAVT0801CVT	38-7/8 (987.4)	3 (78.2)	4-1/2 (114.3)	21-1/8 (536.6)	7-3/8 (189.3)	6-1/2 (165.1)

\* Dimension A will change proportionally as dimension D is lengthened or shortened.

† Dimension D may be lengthened to 60 in. (1524 mm) maximum. Dimension D may also be shortened by cutting the pipes provided in the kit to 12 in. (304.8 mm) minimum.

A97110

## CONDENSATE TRAP

A93026

**NOTES:**

1. Minimum return-air openings at furnace, based on metal duct. If flex duct is used, see flex duct manufacturer's recommendations for equivalent diameters.
2. Minimum return-air opening at furnace:
  - a. For 800 CFM—1½-in. round or  $14\frac{1}{2} \times 12$ -in. rectangle.
  - b. For 1200 CFM—20-in. round or  $14\frac{1}{2} \times 19\frac{1}{2}$ -in. rectangle.
  - c. For 1600 CFM—22-in. round or  $14\frac{1}{2} \times 23\frac{1}{4}$ -in. rectangle.
  - d. For airflow requirements above 1800 CFM, see Air Delivery table in Product Data literature for specific use of single side inlets. The use of both side inlets, a combination of 1 side and the bottom, or the bottom only will ensure adequate return air openings for airflow requirements above 1800 CFM at 0.5 WC ESP.

DIMENSIONS (IN / MM)				
UNIT SIZE	A	D	E	
040 - 14*	24-1/2 / 622.3	22-7/8 / 581.0		23 / 584.2
060 - 14	17-1/2 / 444.5	15-7/8 / 403.3		16 / 406.4
080 - 14	21 / 533.4	19-3/8 / 492.2		19-1/2 / 495.3
080 - 20	21 / 533.4	19-3/8 / 492.2		19-1/2 / 495.3
100 - 20	21 / 533.4	19-3/8 / 492.2		19-1/2 / 495.3
120 - 20	24-1/2 / 622.3	22-7/8 / 581.0		23 / 584.2

\*These dimensions reflect the wider casing for the 96.6% AFUE furnace.

## DOWNFLOW SUBBASE

A97427

**Assembled**

A88207

\* Disk usage—Unless otherwise stated, use perforated disk assembly (factory-supplied in loose parts bag).

† Wide radius elbow.

‡ Vent sizing for Canadian installations over 4500 ft (1370m) above sea level are subject to acceptance by the local authorities having jurisdiction.

NA—Not Allowed; pressure switch will not make.

**NOTES:**

1. Do not use pipe size greater than those specified in table or incomplete combustion, flame disturbance, or flame sense lockout may occur.
2. Size both the combustion-air and vent pipe independently, determine the smallest diameter allowed by the table for each pipe, then use the larger diameter for both pipes.
3. Assume two 45° elbows equal one 90° elbow. Long radius elbows are desirable and may be required in some cases.
4. Elbows and pipe sections within the furnace casing and at the vent termination should not be included in vent length or elbow count.
5. The minimum pipe length is 5 ft (1.5 M) for all applications.

**MAXIMUM ALLOWABLE EXPOSED VENT PIPE LENGTH (FT / M) WITH INSULATION IN WINTER DESIGN TEMPERATURE AMBIENT\***

\* Pipe length (ft/m) specified for maximum pipe lengths located in unconditioned spaces. Pipes located in unconditioned space cannot exceed total allowable pipe length as specified in Table.

†Insulation thickness based on R value of 3.5 per in.

# CLEARANCE TO COMBUSTIBLES

## INSTALLATION

- This forced air furnace is equipped for use with natural gas at altitudes 0 - 10,000 ft (0 - 3,050m), except 140 size furnaces are only approved for altitudes 0 - 7,000 ft. (0 - 2,135m).
- An accessory kit, supplied by the manufacturer, shall be used to convert to propane gas use or may be required for some natural gas applications.
- This furnace is for indoor installation in a building constructed on site. This furnace may be installed in a manufactured (mobile) home when stated on rating plate and using factory authorized kit..
- This furnace may be installed on combustible flooring in alcove or closet at **Minimum Inches Clearance To Combustible Construction** as described below.
- This furnace requires a special venting system. Refer to the installation instructions for parts list and method of installation. In the US this furnace is for use with schedule-40 PVC, PVC-DWV, CPVC, or ABS-DWV pipe, and must not be vented in common with other gas-fired appliances. In Canada, refer to installation instructions for vent materials. Construction through which vent/air intake pipes may be installed is maximum 24 inches (610 mm), minimum 3/4 inches (19 mm) thickness (including roofing materials).
- Cette fournaise à air pulsé est équipée pour utilisation avec gaz naturel et altitudes comprises entre 0 - 3,050m (0 - 10,000 pi), excepté quelques fournaises de 140 taille sont pour altitudes comprises entre 0 - 2,135m (0 - 7,000pi).
- Utiliser une trousse de conversion, fournie par le fabricant, pour passer au gaz propane ou pour certaines installations au gaz naturel.
- Cette fournaise à air pulsé est pour installation à l'intérieur dans un bâtiment construit sur place. Cette fournaise à air pulse peut être installée dans une maison préfabriquée (maison mobile) si prescrit par la plaque signalétique et s'il on utilise une trousse spécifiée par le fabricant.
- Cette fournaise peut être installée sur un plancher combustible dans un enfoncement ou un placard en observant les **Dégagement Minimum En Pouces Avec Éléments De Construction Combustibles**.
- Cette fournaise nécessite un système d'évacuation spécial. La méthode d'installation et la liste des pièces nécessaires figurent dans les instructions d'installation. Aux Etats-Unis, cette fournaise doit s'utiliser avec la tuyauterie des nomenclatures 40 PVC, PVC-DWV, CPVC, ou ABS-DWV et elle ne peut pas être ventilée conjointement avec d'autres appareils à gaz. Au Canada, referer aux instructions d'installation pour les matériaux à ventiler. Épaisseur de la construction au travers de laquelle il est possible de faire passer les tuyaux d'aération (admission/évacuation): 24 po (610 mm) maximum, 3/4 po (19mm) minimum (y compris la toiture).

For upflow and downflow applications, furnace must be installed level, or pitched within 1/2" (12.7mm) of level. For a horizontal application, the furnace must be pitched minimum 1/4" (6.35mm) to maximum of 1/2" (12.7mm) forward for proper drainage. See Installation Manual for **IMPORTANT** unit support details on horizontal applications.

Pour des applications de flux ascendant et descendant, la fournaise doit être installée de niveau ou inclinée à pas plus de 1/2" (12.7mm) du niveau. Pour une application horizontale, la fournaise doit être inclinée entre minimum 1/4" (6.35mm) et maximum 1/2" (12.7mm) du niveau pour le drainage approprié. En cas d'installation en position horizontale, consulter les renseignements **IMPORTANTS** sur le support dans le manuel d'installation.

## MINIMUM INCHES CLEARANCE TO COMBUSTIBLE CONSTRUCTION

### ALL POSITIONS:

\* Minimum front clearance for service 24 inches (610mm).

† † 140 size furnaces require 1 inch back clearance to combustible materials.

### DOWNFLOW POSITIONS:

† For installation on combustible floors only when installed on special base No. KGASB0201ALL or NAHA01101SB, Coil Assembly, Part No. CAR, CAP, CNPV, CNRV or Coil Casing, Part No. KCAKC, or WENC or WTNC.

### HORIZONTAL POSITIONS:

Line contact is permissible only between lines formed by intersections of top and two sides of furnace jacket, and building joists, studs, or framing.

§ Clearance shown is for air inlet and air outlet ends.

Ø 120 and 140 size furnaces require 1 inch bottom clearance to combustible materials.

## DÉGAGEMENT MINIMUM EN POUCES AVEC ÉLÉMENTS DE CONSTRUCTION COMBUSTIBLES

### POUR TOUTES LES POSITIONS:

\* Dégagement avant minimum de 24 po (610mm) pour l'entretien.

† † Pour les fournaises de 140 taille, 1 po (25mm) dégagement des matériaux combustibles est requis au-arrière.

### POUR LA POSITION COURANT DESCENDANT:

† Pour l'installation sur le plancher combustible seulement quand on utilise la base spéciale, pièce n° KGASB0201ALL ou NAHA01101SB, l'ensemble serpentin, pièce n° CAR, CAP, CNPV, CNRV, ou le carter de serpentin, pièce n° KCAKC ou WENC ou WTNC.

### POUR LA POSITION HORIZONTALE:

Le contact n'est permis qu'entre les lignes formées par les intersections du dessus et des deux cotés de la chemise de la fournaise, et des solives, des montants ou de la charpente du bâtiment.

§ La distance indiquée concerne l'extrémité du tuyau d'arrivée d'air et l'extrémité du tuyau de sortie d'air.

Ø Pour les fournaises de 120 et 140 taille, 1 po (25mm) dégagement des matériaux combustibles est requis au-dessous.

This furnace is approved for UPFLOW, DOWNFLOW and HORIZONTAL installations.

Cette fournaise est approuvée pour l'installation HORIZONTALE et la circulation d'air VERS LE HAUT et VERS LE BAS.

Clearance arrows do not change with furnace orientation. Les flèches de dégagement ne changent pas avec l'orientation de la génératrice d'air chaud.

# GUIDE SPECIFICATIONS

## General

### System Description

Furnish a \_\_\_\_\_ 4-way multipoise gas-fired condensing furnace for use with natural gas or propane (factory-authorized conversion kit required for propane); furnish cold air return plenum; furnish external media cabinet for use with accessory media filter or standard filter.

### Quality Assurance

Unit will be designed, tested and constructed to the current ANSI Z 21.47/CSA 2.3 design standard for gas-fired central furnaces.

Unit will be third party certified by CSA to the current ANSI Z 21.47/CSA 2.3 design standard for gas-fired central furnaces. Unit will carry the CSA Blue Star® and Blue Flame® labels. Unit efficiency testing will be performed per the current DOE test procedure as listed in the Federal Register.

Unit will be certified for capacity and efficiency and listed in the latest GAMA Consumer's Directory of Certified Efficiency Ratings.

Unit will carry the current Federal Trade Commission Energy Guide efficiency label.

### Delivery, Storage, and Handling

Unit will be shipped as single package only and is stored and handled per unit manufacturer's recommendations.

### Warranty (for inclusion by specifying engineer)

U.S. and Canada only. Warranty certificate available upon request.

## Equipment

### Blower Wheel and ECM Blower Motor

Galvanized blower wheel shall be centrifugal type, statically and dynamically balanced. Blower motor of ECM type shall be permanently lubricated with sealed ball bearings, of \_\_\_\_\_ hp, and have infinitely variable speed from 250-1300 RPM operating only when 24-VAC motor inputs are provided. Blower motor shall be direct drive and soft mounted to the blower scroll to reduce vibration transmission.

### Filters

Furnace shall have reusable-type filters. Filter shall be \_\_\_\_\_ in. (mm) (X) \_\_\_\_\_ in. (mm). An accessory highly efficient Media Filter is available as an option. \_\_\_\_\_ Media Filter.

### Casing

Casing shall be of .030 in. thickness minimum, pre-painted galvanized steel.

**Infinity™ 96**

## **Two-Stage/Variable Speed Gas Furnace**

### ECM Inducer Motor

ECM Inducer motor shall be variable speed design, soft mounted to assembly to reduce vibration transmission.

### Primary Heat Exchangers

Primary heat exchangers shall be 3-Pass 20 gauge corrosion-resistant aluminized steel of fold-and-crimp sectional design and applied operating under negative pressure.

### Secondary Heat Exchangers

Secondary heat exchangers shall be of a flow-through design having a patented interior laminate coating of polypropylene for greater corrosion resistance with fold-and-crimp design and applied operating under negative pressure.

### Controls

Controls shall include a micro-processor-based integrated electronic control board with at least 16 service troubleshooting codes displayed via diagnostic flashing LED light on the control, a self-test feature that checks all major functions of the furnace, and a replaceable automotive-type circuit protection fuse. Multiple operational settings available, including separate blower speeds for low heat, medium heat, high heat, low cooling, high cooling and continuous fan. Continuous fan speed may be adjusted from the thermostat. Cooling airflow will be selectable between 350 or 400 CFM per ton of air conditioning. Features will also include temporary reduced airflow in the cooling mode for improved dehumidification when an Infinity Control or Thermostat is selected as the thermostat.

## **Operating Characteristics**

Heating capacity shall be \_\_\_\_\_ Btuh input;  
\_\_\_\_\_ Btuh output capacity.

Fuel Gas Efficiency shall be 92 to 96.6% AFUE.

Air delivery shall be \_\_\_\_\_ cfm minimum at 0.50 in. wc. external static pressure.

Dimensions shall be: depth \_\_\_\_\_ in. (mm); width \_\_\_\_\_ in. (mm); height \_\_\_\_\_ in. (mm) (casing only).

Height shall be \_\_\_\_\_ in. (mm) with A/C coil and \_\_\_\_\_ in. (mm) overall with plenum.

## **Electrical Requirements**

Electrical supply shall be 115 volts, 60 Hz, single-phase (nominal). Minimum wire size shall be \_\_\_\_\_ AWG; maximum fuse size of HACR-type designated circuit breaker shall be \_\_\_\_\_ amps.

## **Special Features**

Refer to section of the product data identifying accessories and descriptions for specific features and available enhancements.
